**ATTACHMENT A**

This warrant authorizes the use of the electronic investigative technique described in Attachment B to identify the location of the cellular device assigned phone number 248-636-9505, whose wireless provider is T-Mobile.

This Warrant also serves as a Pen Register order under 18 U.S.C. § 3123. The Court makes the following findings: Tammie Wade is the person to whom the pen register or trap and trace device is to be attached/applied and who is the subject of the criminal investigation; 248-636-9505 is the phone number to which the device is to be attached; and Title U.S.C. § Statute is the offense, or one of the offenses, to which information relates; and

The attorney for the government has certified to this Court that the information likely to be obtained by the installation and use of the pen register or trap and trace device is relevant to an ongoing criminal investigation by the United States Marshals Service.

**ATTACHMENT B**

**Particular Things to Be Seized  
from Cell Phone Service Provider**

1. Information about the target cell phone and its location, later referred to collectively as location information, include all precision location information, E-911 Phase II data, GPS data, latitude-longitude data, per call measurement data (PCMD), and real time cell site information for 30 days, beginning from the date the warrant was issued. The information includes monitoring non-content signaling and routing information, including all non-content packet switched data, through the installation and use of a pen register and trap and trace device pursuant to 18 U.S.C. § 3123 by the service provider and the United States Marshals Service. Because the request for such location data may include use of a “pen register” or a “trap and trace device,” see 18 U.S.C. § 3127(3) & (4), the application and the warrant are designed to comply with the Pen Register Statute as well as Rule 41. The application therefore includes all information required for and serves as a pen register application, 18 U.S.C. § 3123(a); similarly, the warrant therefore includes all the information required for and serves as a pen register order, 18 U.S.C. § 3123(b).

2. To the extent that the information described is within the possession, custody, or control of the service provider, the service provider is required to disclose all location information to the government.

3. All subscriber, extended subscriber, handset information, and WI-FI MAC address, as well as all technical assistance necessary to accomplish the collection of the location information unobtrusively and with as little interference as possible. This includes initiating a signal to determine the location of the target cell phone on the service provider's network or with such other reference points as may be reasonably available and at such intervals and times directed by the government.

4. Call detail records with cell site location information for voice, SMS, MMS, and data connections and PCMD / RTT reports for the past thirty (30) days. The government shall compensate the service provider for reasonable expenses incurred in furnishing such facilities or assistance. Any service provider or representative who gains access to the information in this warrant shall not disclose the existence of the warrant or investigation unless disclosure is to their attorneys for purposes of seeking legal advice or disclosure is explicitly allowed / ordered by the Court.

5. This warrant does not authorize the seizure of any tangible property.

In approving this warrant, the Court finds reasonable necessity for the seizure of the information described. *See* 18 U.S.C. § 3103a(b)(2).
